IgG Boost®

Shield your body

POSITIONING STATEMENT
A baby’s immune system at birth is vulnerable to the unfriendly microorganisms of a new environment. Nature can help provide a biological defence with colostrum, a mother’s first milk. One particularly active component of both human and bovine colostrums is Immunoglobulin G, or IgG.

IgG Boost contains a standardised extract of bovine colostrum. This colostrum has an extract standardised to 40% IgG content, making it many times more concentrated than other colostrum products on the market today.

IgG Boost is purified from excess first milk of cows in the dairy industry and meets the strict Pharmanex® 6S Quality Process for safety and efficacy.

CONCEPT
The immune system is the body’s defense against infectious organisms and other invaders. Through a series of steps the immune system fights unwelcome organisms and substances that invade our body system.

The immune system is made up of a network of cells, tissues and organs that work together to protect the body. The cells involved are white blood cells, or leukocytes, which recognise a seemingly infinite number of organisms considered as foreign to the body and directly fight them.

PRIMARY BENEFITS AND FEATURES
• Contains a standardised extract of bioactive proteins including colostrum immunoglobulins.
• Provides a broad spectrum of antibodies to supplement those naturally produced by your body.
• The colostrum is standardised to a 40% IgG content.
• Colostrum is supported by peer-reviewed and published clinical tests for safety* and efficacy.

WHO SHOULD USE THIS PRODUCT?
IgG Boost can be used by all adults who want to shield their body.
DAILY USAGE
Take two (2) capsules twice daily with food and drink.

WARNINGS:
Do not exceed the recommended daily dose. A food supplement should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not use if safety seal is broken, damaged or missing. Keep away from heat and humidity. Keep out of reach of young children. Consult a doctor before using this product if you are pregnant, lactating or under medical treatment.

Please note that some European Member States may have additional specificities that are linked to their national legislation. If applicable, you will find these in the country specific version of this document, in the respective national language(s).

INGREDIENTS
Protein isolate of colostrum milk (42% - 1000 mg/4 caps.) of which 400 mg/4 caps. of IgG (17%), Bulking agent: Calcium phosphates, Capsule (Gelatine), Bulking agent: Microcrystalline cellulose, Anti-caking agent: Magnesium salts of fatty acids
May contain eggs, fish and products thereof.

FREQUENTLY ASKED QUESTIONS
What is IgG Boost®
IgG Boost® contains an extract of IgG molecules, immune proteins found in human colostrum and body that boost our inherent immunity.

What are the active components of IgG Boost®
IgG Boost® contains a standardised concentrate of bioactive proteins including broad-spectrum antibodies (immunoglobulins). Using specific techniques, IgG Boost® is standardised to 40% immunoglobulin G (IgG). IgG Boost® also contains other naturally occurring proteins.
